

CP175

JAWS

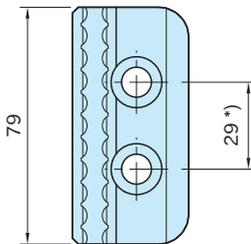

CP175-08001RS (Serrated)

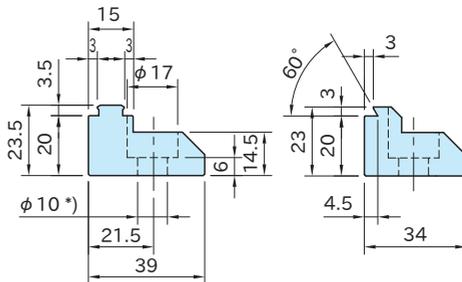

CP175-08001D (Dovetail)

Part Number	Type	Weight (g)
CP175-08001RS	Serrated	710
CP175-08001D	Dovetail	600

Body
SCM440 steel
Quenched & tempered
Black oxide finished

CP175-08001RS

(Serrated)(2 pcs. as a set)

CP175-08001D

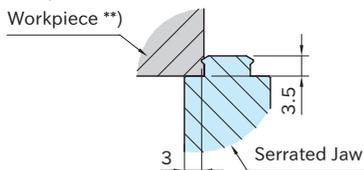

(Dovetail)(2 pcs. as a set)

How To Use

Use as jaws of **CP170-N** Centering Clamps.

■ Serrated Jaw

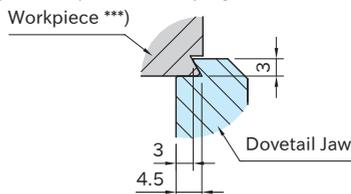

The serrated tips bite into workpiece and clamp powerfully.

***) Workpiece hardness should be HRC38 or less for use of serrated jaw.

■ Dovetail Jaw

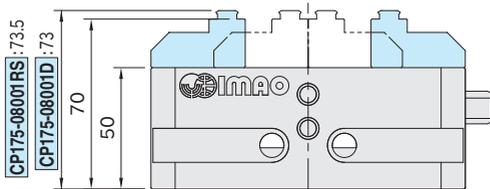

Dovetail jaw holds workpiece at two surfaces and provides positive clamping.

***) Preparation of dovetail groove on workpieces is required.

Technical Information

■ Dimensions of Centering Clamps with Jaws

Centering Clamps
CP170-N

■ Dovetail groove preparation

Machine dovetail grooves on workpiece to the specifications below.
